

STRUCT-Scope: Changes due to software update from STRUCT-Scope V1.3 to V2.0

Change 1:

The STRUCT Scope software is now also available for the L-LAS-RL-CL series. The software automatically detects whether a COAST, GLAST or L-LAS-RL-CL sensor is connected.

Change 2:

A new evaluation module VIDEO LENGTH / 256 has been inserted. In this case, the length of the video signal is viewed and used as a further parameter for evaluation.
